

ANTI-MALARIA SERVICE POSTCARDS

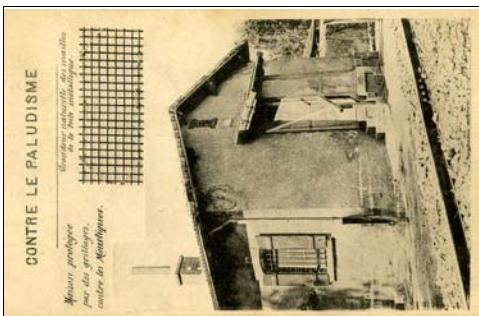

ALGERIA • 1940S

Under the direction of Doctors Edmond and Etienne Sergent of the Pasteur Institute of Algeria, the Algerian Health Service produced postcards promoting malaria control and prevention. Issued in the 1940s in at least two series, the cards described malaria transmission, prevention, and prophylaxis. One group (A) of cards is labeled CONTRE LE PALUDISME and another group (B) PROPHYLAXIE DU PALUDISME. Additional cards (C-D) from the institute or the health service are also presented below. Horizontal cards measure 142 x 63 mm; vertical cards measure 63 x 142 mm. The cards shown are those reported to date. Others may exist.

Notes: the reverse of the cards has no malaria-related text
