Below and on the following pages are the numerous varieties that, based on material reported, can exist for the issue. These are generally considered printer's waste, but some may be legitimate proofs or errors released to the public. Unless otherwise noted, each variety likely exists for the three stamps in the set. Imperforate pairs and gutter pairs exist both horizontally (h) and vertically (v). Unreported varieties are shown via digitally created images. Numbers for these are preceded by an **X**. Shown first are the stamps, then the souvenir sheets. The sections end with items that may be proofs. Each of these items contains a **P** as a part of its catalog number. Prices are for the sets or singles as numbered.
