A non-profit organization established in 1960 by Dr. Vincenzo Marcolongo (March 6, 1922 - February 2, 1988), the International Association for Medical Assistance to Travelers (IAMAT) advises travelers about health risks, the geographical distribution of diseases, and immunization requirements for all countries; and it makes competent medical care available to travelers by western-trained doctors who speak English besides their mother tongue.

IAMAT maintains a network of physicians – general practitioners and specialists, hospitals and clinics around the world – who have agreed to treat IAMAT members in need of medical care during their journeys. IAMAT continuously inspects clinics to ensure that travellers receive competent medical care.

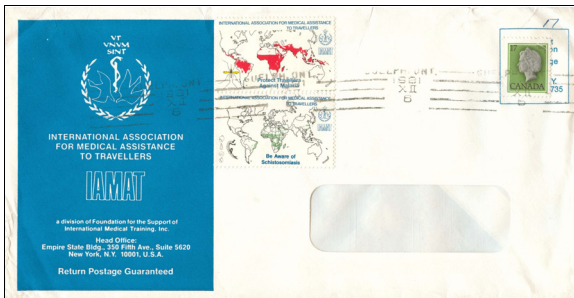

Any individual traveller can belong to IAMAT. Membership is free, although a donation is appreciated to help support and expand IAMAT's work. For membership conditions, contact IAMAT.
