UNITED NATIONS

WORLD HEALTH DAY – 7 APRIL 1972

Plans for economic development and for raising standards of living cannot succeed anywhere in the world unless plans are made for health improvement at the same time.

"Health is a state of complete physical, mental and social well-being and not merely the absence of disease or infirmity."

So reads but one of the terms of the Constitution of the World Health Organization, a United Nations specialized agency established on 1 September 1946 to achieve the highest possible standards of health all over the world.
